We are contemplating publishing a list of delinquent subscribers who allow us to stop the paper the first of the year without paying us what they owe us. We will also place the amount opposite the name so no one else can be cheated by those who thus cheat us. It is a newspaper's business to do all the good it can for a county, and what could be of more use than a list of persons who will not pay their honest debts? Everyone could keep it handy, and when a man asked for credit refer to the list and if his name is written there then beware, but if not trust him.

It is an elegant book of sixty-four pages, besides the cover, with an attractive original design on the cover. It contains Prof. Hicks' monthly weather forecasts complete for the year 1894, all the current astronomical phenomena for each month, finely illustrated, including four eclipses and the transit of the planet Mercury, an article on "Foundation Facts," giving the philosophy and essential points of Prof. Hicks' weather system, a paper on the use of barometers and scientific instruments, an article on longitude and time by the leading authority on time in this country, accompanied by an excellent map and other useful articles. Mr. Jones is one of the bright young men of our county, being a graduate of Maryville College. Mr. Brickett has been prescription clerk in one of the drug stores at this place for some time. We predict a brilliant career for these young men in their chosen profession, as they both seem to be in love with their work, and this is one of the main essentials of success. Mr. Will Wine, another Blount county boy, is also attending the same school. Boys study hard and come back loaded with honors and learning and your native county will share them with you.

**Storm Prophet Hicks' Paper.**  
Many persons know of Rev. Irl L. Hicks, the noted storm prophet, but are not so well acquainted with the fact that his monthly paper, Word and Works, is one of the most attractive and instructive journals in America, and is doing more to educate the people in science than any other. It not only contains Rev. Hicks' forecasts, complete and unabridged, but also articles from his pen on astronomy and planetary meteorology, finely illustrated. There is a sermon or religious article in each number, a "Home Sweet Home" department edited by a lady, a "Youth and Beauty" department for boys and girls, "Queries" for those who want hard nuts cracked and many other good things. All this for the low price of \$1 per year. All subscribers who pay for a year's subscription in advance before Feb. 1, 1894, will receive free as a premium Rev. Irl L. Hicks' Almanac for 1894. This book is well worth the subscription price. Send six cents for a sample copy of the paper, or send \$1 for a year's subscription to Word and Works Publishing Co., St. Louis, Mo.

#### Obituary.

Mrs. Cynthia Henry departed this life Oct. 16th 1893, in the full triumph of faith and at a ripe old age, having been permitted to enjoy the blessings of life for 69 years. She lived in favor with the Lord and died wrapped up in His love and care. Faithful to the performance of every obligation, and guardful of every interest of the cause of Christianity, the church feels that in her it has lost a valuable and staunch supporter.

She was admired for her high moral qualities, loved because she possessed such amiable characteristics, and her memory will be revered because she presented such a noble example and gave such timely instructions to all with whom she came in social contact.

At all times she recognized that the object of her creation was to do good and assist in moulding a pure sentiment in her community, and when "death fell upon her softly and sweetly, as if from a passing cloud," she had finished her course and was ready to be offered up.

May the daughters, relatives and friends that she leaves strive to imitate her life in purity, integrity and sobriety, and obey the voice that speaks in silent influence from the tomb.

The friends who assisted so faithfully to administer to her wants while sick are greatly thanked by her children. Peace to her ashes.

#### The Other Side.

**MR. EDITOR**—Like Mr. Anderson, I wish to make a few statements in regard to that speaking match, as spoken of in last week's issue of your paper. I have a reason for writing this, which is this: I feel that I have been placed in a very embarrassing position, and that unjustly. I shall endeavor to give you the facts of the case, which I can prove by one of his own scholars. As I had a small school of small scholars he knew very well that I could not rely on my school to spell against his, which consisted of several extra good spellers, so he sent me word by a cousin of mine, who is a scholar of his, to get a crowd and come over and spell an equal number, not his school, as he would have you believe. Consequently I picked up a crowd of seventeen, as has already been seen from Mr. Anderson's statement. The reader will also know by Mr. Anderson's statement how the matter was. In regard to his furnishing seven of his own scholars to make an equal number, I will say that I did not in-dorse the idea, but in order to come to some conclusion and to get to work, as it was getting very late, I reluctantly consented to do so, and after spending a short time quit off with three tallies ahead, as you already know. As I did not write the article which occasioned Mr. Anderson to write, I think that he should not entertain anything but a good will towards me. Hoping that the foregoing remarks will meet with the approbation of all concerned, I will close by signing my name.—W. D. Hammontree.
